Colour Palette STAMPER

Ink colors can be changed quickly and easily, without the need to clean the stamp surface!

This stamp's ability to allow for the changing and the adding of color without the need for cleaning the stamp surface is just one of the features that set it apart from other stamps available today. The stamper is pre-inked in classic black ink, ready to be used (it also comes with two small tubes of red and black ink). However, the real magic happens when additional colors are directly added to the impression surface, allowing for customization and transformation of the stamp's appearance. 36 ink colors are available.
