

# Artline® low corrosion paint markers

Metal Fabrication

Auto Fabrication

Shipbuilding

**2.3mm nib**  
**Acrylic Fiber Tip**  
**Bullet Style Nib**  
**Fast Drying**  
**Water-Resistant**  
**Fade-Resistant**

Valve Action

Corrosion can be a common problem in manufacturing. The dissolving or rusting of metals as a result of chemical reactions between the metal and its environment may prove to be a costly setback. Our new ink formula, developed to our own strict standards, is designed to minimize the opportunity for corrosion to occur.

- Suitable for marking on most surfaces
- Ideal for indoor and outdoor use where permanent indelible marking is required
- For use in many industries, such as automobile and electronics manufacturing
- Low levels of Chlorides, Halogens, Sulfur and low melting point metals
